

portable digital recording and transcription solutions

Evidence Technology has a long and proud history of design and development of bespoke digital recording and transcription systems to suit all requirements and budgets.

Ranging from two up to thirty two inputs and up to four discreet recording channels, Evidence Technology custom designed solutions offer reliability, flexibility and outstanding quality recordings any time, any place, anywhere. Evidence Technology can also provide real time audio and video streaming services specifically designed for remote locations with poor network coverage.

Custom Design Solutions

Technically advanced yet simple in operation, Evidence Technology custom designed digital recording and transcription systems are designed for flexibility, ease of operation and maintenance. Often referred to as a courtroom in a box, all systems comprise high quality fully fitted and integrated components.

Features and Options

Standard design features for typical meeting and courtroom reporting services include:

- Built in digital mixer
- Digital recording software
- Notebook computer included
- Microphones, stands and clips
- All cables provided
- Ruggedized portable design
- Simple operating instructions
- Industry standard components
- Return to base service offerings
- Purchase, rent or hire, finance available

Our standard configurations are suitable for most operating environments. However, for those who have specific requirements our custom shop will consult with you to design and build a system specifically tailored to your unique requirements.

Business Benefits

- Take court to the people
- Reduced fixed overheads
- Minimise hearing costs
- Improves resource utilisation
- Eliminate unnecessary travel
- Reduces carbon emissions
- Capture high quality evidence
- Aircraft carry on luggage

Optional Accessories

- Network back to base
- Portable satellite service
- Streaming audio and video

Back to Base Support

Remedial and preventative maintenance support options are provided along with stand-by and 'hot-swappable' component design. This ensures high levels of system availability and redundancy.

A range of service level offering includes back-to-base (regional service centres) and a simple maintenance service fee structure.

Weight and Size

Evidence Technology portable recording systems range from ultra portable units (10 to 15Kg) small enough to be stowed in cabin luggage to the more robust 'big berth'. All systems are housed in ruggedized casings, designed for ease of transport and, the rough and tumble of daily use.

Operating Environment

- Operating Temp: 0° to 50° C
- Storage Temp: -10° to 70° C

Who is using our Systems?

- Courts, Councils and Tribunals
- Court Reporting Agencies
- Commissions of Inquiry
- Justice Ministries

Try before you Buy

Evidence Technology offers the following flexible ways for you to take advantage of its digital portable recording system:

- Outright purchase
- Managed Service (we operate)
- Long term rental or hire

Focus on Quality of Service

Evidence Technology understands that there is no substitute for quality and local dedicated support personnel for effective delivery of normal and critical support.

Maintaining and building strong relationships with our clients and associated service providers enable our business to be highly responsive and accountable for the outcomes you require.
