

electronic trial solutions and support services

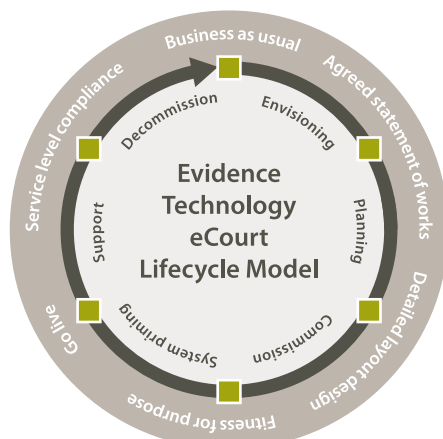

Choosing the Right Partner

Engaging the right eCourt technology partner is a crucial decision to make. Choose badly and your case may be at risk – choose wisely and its plain sailing. But how does one make informed decisions when there seems to be so many technology options to consider?

Over the years Evidence Technology has been at the leading edge of electronic trial services. This experience has culminated in the development of a simple framework to guide those members of the team that just require courtroom technology to work first time, every time.

eCourt Lifecycle Model

Helping people understand how technology will be used in an e-trial is the first step towards a successful electronic trial. Planning is essential as every case will be subtly different. Remote witnesses, Multi-party video conferences and telepresence are increasingly the norm.

Evidence Technology's in-house methodology for facilitating the eCourt services delivery seeks to

1. Provide time control
2. Reduce technology risk,
3. Manage costs effectively

Clearly, every matter and every courtroom is potentially different so the approach we adopt is fine tuned to maximise not only the in court experience but also the quality of the material that is acquired, created, captured, stored and processed as part of the litigation process.

The System Works for You

Evidence Technology seeks to facilitate the use of rather than simply manage the operation of courtroom technology during a trial. We see it as our responsibility not only to ensure the performance of the system but to assist users maximise its potential. Training and support are therefore central aspect of the Evidence Technology eCourt service offering.

Our Focus on Quality

Design, planning, installation, priming, support and decommissioning processes are staged with responsibilities and preconditions for proceeding well defined to avoid confusion.

Evidence Technology employs proven quality management systems to meet internationally accepted standards. Each eCourt engagement is treated as a project – with our client as the sponsor and with clearly defined scope, time and cost controls.
